

Marrakech on my budget

Compare choices, calculate your group's costs and select activities without relying on headline prices.

AI illustration - fictional scene / interpretation, not documentary.

ENGLISH / EDITION 1.0 / OCTOBER 2026

A chosen budget, not a promise

This book concerns a tourist stay, not a resident's cost of living. It separates officially observed prices from calculation assumptions. Scenarios are neither quotes nor measured market averages.

Use them to prepare your own price requests. Amounts are in Moroccan dirhams, MAD or DH. No exchange rate is fixed here: check the actual billed amount and your bank's fees.

Compare like-for-like offers. A room, meal or outing only has value if it meets your needs. All images are AI illustrations; pictured properties and people are not recommended providers.

Define the scope

Start with adults, children, rooms, nights and meal days. A room cost is often shared; admission normally multiplies by visitor. Keep those two patterns separate.

Add arrival transport, local movement, activities, shopping, possible charges and a reserve. Keep flights separate so local stays can be compared regardless of departure city.

Our scenarios assume two adults, one room, three nights and four days of daily spending. Flights, insurance, formalities, personal shopping and excursions outside the city are excluded. Recalculate for your own duration.

Per room × nights

Per person × days

Fixed costs + reserve

Three scenarios to recalculate

Teaching assumptions for the whole group, not available offers. Room: MAD 300 / 600 / 1,200 per night; food: MAD 120 / 200 / 350 per adult per day. Transport and activity allowances are chosen caps, not guaranteed fares.

The reserve is 15% of the subtotal: a planning choice here, not a requirement or a guarantee covering every disruption. Replace every assumption with your own quotes.

Group: 2 adults	Simple	Comfort	Larger
Room × 3 nights	900	1,800	3,600
Food × 2 × 4 days	960	1,600	2,800
Transport allowance	300	500	900
Activity allowance	400	700	1,200
Subtotal	2,560	4,600	8,500
Reserve 15%	384	690	1,275
Total MAD	2,944	5,290	9,775
